CMS

PRESTASHOP · WordPress

DESIGN

Interaction Design

axureRP · Xd Experience Design · DRAW.IO

Graphic Design

Ai Illustrator · Ps Photoshop · Id InDesign

Experience

Front-end developer & Interaction designer
Surely Group - London - Nov 2016 to present

Working with Surely has been the opportunity to sharpen my skills on Ionic/Angular and to participate to the design process of plenty of many exciting projects.

It was also the chance to experiment the implementation or the rebuilding of frontend structures for newer and older projects.

Front-End Consultant (remotely)
Doxy.me - Provo (USA) - Dec 2016 to Jan 2017

I have been hired as consultant to review their existing Ionic app and to provide suggestions about what could be done to make the project more scalable.

UX Designer & Front-End developer
iMakr & MyMiniFactory - London - Feb to Nov 2016

I worked on two projects:

- An eCommerce plateform for iMakr built with prestashop and Bootstrap.
- A 3D printable contents sharing platform for MyMiniFactory (iMakr's subsidiary) built with Symfony and Foundation.

Every implementation was preceded by a discovery and design phase during which I was producing high fidelity mockups and prototypes. I was also working closely with our in-house 3D designers who were providing their useful feedbacks and suggestions to me.

UX designer & Front-end developer
DigiTela - Montpellier Area (France) - Apr to Jun 2015

My first professional experience as a developer and as a designer. I was mostly working on the mockups and the development of our clients' websites with Wordpress. My tasks were:

- To redefine and implement the graphical identity of my company's website.
- Create a platform for an association about cancer research.
- Create a design for the showcase website of a southern France hairdressers and aestheticians' association.

The best part about this role was the possibility to communicate directly with the clients. Which helped me a lot at understanding their needs then elaborating the mockups in accordance.

Projects

Surely Group - Web app
Surely Group | Frontend developer & UX designer

A Lloyd's of London insurer - Web app
